DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-26 and 29-52, drawn to an interconnect structure an interconnect structure comprising a first layer of titanium nitride, an aluminum film, a second layer of titanium nitride between the first layer of titanium nitride and the aluminum film wherein the second layer of titanium nitride comprises a polycrystalline orientation that comprises a mixture of 1:1 of <111> and <200> oriented grains that are effective for forming an aluminum film of small grain size, classified in class 257, subclass 763.
- II. Claims 27 and 28, drawn to an aluminum film supported by a semiconductor substrate, wherein the aluminum film has a grain size of approximately less than 0.25 micron in diameter, classified in class 428, subclass 650.

The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination requires the second layer of titanium nitride to have a polycrystalline orientation that is of a mixture

Art Unit: 2814

of 1:1 of <111> and <200> oriented grains. The subcombination has separate utility such as anti-reflective or protective coating or as masking layer.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
